Abstract

In 1968 MacDonald foresaw the possibility that in the future the military might develop the means to trigger earthquakes: “The key to geophysical warfare is the identification of the environmental instabilities to which the addition of a small amount of energy would release vastly greater amounts of energy.” In 1997, U.S. Secretary of Defense William Cohen confirmed military involvement in such activities. In 2002, the 90 deputies of the Russian State Duma warned the United Nations that Americans were experimenting with a new geophysical weapon and demanded an international ban. The United States, Norway and other nations possess electromagnetic “ionosphere heaters” that are capable of triggering earthquakes. On February 6, 2023, a powerful 7.8 magnitude earthquake occurred in southern Turkey near the northern border of Syria, followed by another earthquake and aftershocks that devastated parts of Turkey and Syria, with the death toll reportedly exceeding 55,100, the majority being women and children, many more injuries, and an estimated 1.5 million people made homeless. Real and fake news reports before and immediately following the event, together with scientific facts and circumstances described here, warrant a full, thorough, and complete investigation by the International Criminal Court of our allegations that said February 6, 2023 earthquake was deliberately triggered and constitutes war crimes and crimes against humanity.

ALLEGATIONS OF CRIMES: INTRODUCTION

In 1968 MacDonald [1] foresaw the possibility that in the future the world’s militaries might develop the means to trigger on-demand covert environmental modifications to cause storms, floods, droughts, earthquakes, and tidal waves. As he explained:

“The key to geophysical warfare is the identification of the environmental instabilities to which the addition of a small amount of energy would release vastly greater amounts of energy.”

As reviewed [2], MacDonald [1] discussed purposefully triggering instabilities in such large-scale natural systems as the weather, the climate, the oceans, and the human brain, including

such phenomena as hurricanes, earthquakes, and tsunamis for use in warfare. He was aware, considering the limitations of geophysical understanding, that one should also anticipate unforeseen adverse consequences that could arise from deliberately disturbing complex natural systems that have unknown “tipping points.”

In 1997, U.S. Secretary of Defense William Cohen confirmed military involvement in just the activities Macdonald had predicted as evidenced by Cohen’s direct statement [3]:

“Others are engaging...in an eco-type terrorism whereby they can alter the climate, set off earthquakes, [and] volcanoes remotely through the use of electromagnetic waves.... It’s real, and that’s the reason why we have to intensify our efforts.”

An unclassified final document of findings and determinations signed by 90 deputies, released by the Russian State Duma in 2002, and sent to President Putin, the United Nations, and others warned that Americans were experimenting with a new type of geophysical weapon without international control, referred to as HAARP, the acronym for High Frequency Active Auroral Research Program [4]. The signatories demanded that an international ban be placed on such large-scale geophysical experiments.

In 2011, an email from Jacob J. (Jake) Sullivan (now National Security Advisor to the Biden Administration) to then Secretary of State Hillary Clinton [5] indicates that the time of a 6.3 magnitude earthquake in New Zealand was known in advance and provides compelling evidence that the earthquake was deliberately triggered:

From: Sullivan, Jacob J [SullivanJJ@state.gov]
Sent: Monday, February 21, 2011 7:35 PM
To: H; Mills, Cheryl D; Abedin, Hume; Reines, Philippe I
Subject: Fw: 6.3 magnitude earthquake in Christchurch, New Zealand
And on cue... [emphasis added]

That earthquake occurred at a depth of 5.9 km, later estimated to be magnitude 6.1. There were 185 deaths as a result of the earthquake, and 6,659 major injuries (in the first 24 hours) [6]. A delegation of 9 U.S. Congressmen departed the city before the quake occurred [7].

On February 6, 2023, a powerful 7.8 magnitude earthquake occurred in southern Turkey near the northern border of Syria. This earthquake was followed about 9 hours later by a 7.5 magnitude earthquake approximately 90 km to the north [8]. These earthquakes and aftershocks devastated parts of Turkey and Syria with the death toll reportedly exceeding 55,100, the majority being women and children [9-11], and an estimated 1.5 million people made homeless [12] (Figure 1). News reports before and immediately following the event, together with scientific facts and circumstances presented below, warrant a full, thorough, and complete investigation by the International Criminal Court of our allegation that the said February 6, 2023 earthquake was deliberately triggered and constitutes war crimes and crimes against humanity.

Figure 1. Scenes of damage from the February 6, 2023 earthquake in Turkey.

METHOD AND MEANS FOR TRIGGERING EARTHQUAKES

Rocks under stress beginning to fracture generate electromagnetic radiation [13-16]. So, it is also with earthquakes [17-19].

Earthquakes result from the catastrophic release of stress that had developed as tectonic plates grated together. Numerous studies, e.g. [14, 17-23], have documented that, as earthquakes are about to occur, electromagnetic radiation is produced at ultra low frequencies (ULF, <3 Hz), extremely low frequencies (ELF, 3-3000 Hz), and very low frequencies (VLF, 3-30 kHz). As electromagnetic radiation, observed as earthquakes are about to occur [14, 17-23], is observed at or above the surface, demonstrates that electromagnetic radiation of said frequencies can travel through the ground to the depth at which some earthquakes occur. The specific mechanism is yet unknown, but presumably involves micro-fractures forming a resonant cavity or antenna.

A radiation producing resonant device will absorb energy from an external energy source at the same resonant frequency. A vibrating tuning fork will initiate vibrations in a nearby identical tuning fork. Thumping or circling the rim of a crystal glass with a moist finger will cause a crystal glass to resonate in the audio frequency range; a singer's voice at its resonant frequency will cause a crystal glass likewise to resonate and even to shatter [24]. A radio frequency circuit tuned to the frequency of external electromagnetic radiation will absorb energy from external electromagnetic radiation of the same frequency [25]. The same general principle applies to the electromagnetic radiation producing resonance of highly-stressed fault lines in the Earth's crust.

Without ambiguity it follows that ULF/ELF/VLF electromagnetic radiation of the appropriate range of frequencies, applied to a highly stressed, unstable junction of tectonic plates, can trigger an earthquake.

The ULF/ELF/VLF electromagnetic radiation produced in the early stages of earthquake formation has been observed by satellites [14, 17-23], evidence that said radiation propagates in the Earth-ionosphere waveguide [26]. Significantly, ULF/ELF/VLF electromagnetic radiation produced by modulated high-frequency electromagnetic heating of the ionosphere [27-30] with HAARP or similar ionospheric heaters such as Tromsø in Norway [31], can be steered [32, 33] and can travel thousands of kilometers in the Earth-ionosphere waveguide [34-37] to reach a point of geophysical seismic instability to trigger an earthquake [38-40].

Figure 2 (left) shows the HAARP ionospheric heater in Gakona, Alaska (USA). Its 180 units are capable of producing a total radiated power level of 3.6 MW with an effected radiated power of approximately 575 MW [36, 41]. Figure 2 (right) shows one of the other ionosphere heaters, this one in Tromsø, Norway, with an effective radiated power of 300 MW [29, 31, 42] which, like HAARP, is capable of triggering earthquakes [38-40].

Figure 2. Left: High Frequency Active Auroral Research Program (HAARP) facility in Gakona, Alaska (USA). Right: Norwegian Tromsø ionosphere heating facility.

CIRCUMSTANTIAL EVIDENCE

A February 3, 2023 Aljazeera report, three days before the earthquake in Turkey, stated [43]:

“Earlier this week nine Western nations either closed down their consulates in Istanbul or issued travel warnings to citizens visiting Turkey, citing security threats.... Turkey says Western nations, including the United States and Germany, have not given it any information to back up their assertions that security threats had prompted them to close their missions in the country.... The measures angered Turkey, which on Thursday summoned the countries’ ambassadors in protest.... ‘they say there is a terror threat ... But when we ask what the source of information was and who the perpetrators of such attacks might be, they did not share any information with our intelligence and security authorities,’ Turkish Foreign Minister Mevlüt Çavuşoğlu said... and ‘We have the information that some countries asked others to shut their consulates.’”

As reported February 14, 2023 [44]: “According to Romanian Senator Diana Ivanovici Şoşoacă, [the] earthquake in Turkey and Syria was caused by the U.S.”

Speaking before the Romanian Parliament two days after the earthquake [45], the Senator observed:

- 24 hours before the earthquake, 10 Western countries recalled their ambassadors from Ankara.
- 5 days before the earthquake, several Western countries, including Romania, issued a travel warning to Turkey without providing a motivation.
- One minute before seismographers detected the earthquake, Turkish gas and oil pipelines were shut down. (This is the only assertion unverified by [44])

Further evidence that at least the first of the February 6, 2023 earthquakes were deliberately triggered is the speed with which disinformation sources swung into action to deceive the

public by providing false and/or misleading opinions, totally devoid of scientific basis, frequently targeting news sources as “conspiracy theorists” [46-50]. Mick West is well-known for disseminating false information related to Deep State covert activities [51, 52], such as the covert widespread jet-spraying of toxic particulates into the air we breathe, aka chemtrails [53-55], destruction of the World Trade Center towers [56-58], and activities of the Central Intelligence Agency [59, 60]. Mick West reportedly stated that HAARP “can only affect a small amount of the air above it” [61]. West’s illustration from [62] is shown in Figure 3a. Contrast his Figure 3a deceptive caption, “This is roughly the extent of HAARP effect. It heats the ionosphere about 70km above the ground directly above its Alaska location” to the fact that scientists acknowledge and illustrate in the peer-reviewed scientific literature that electromagnetic waves produced by HAARP and other ionosphere heaters “can travel thousands of kilometers” [34-37], illustrated in Figure 3b from [37] and in Figure 3c from [36].

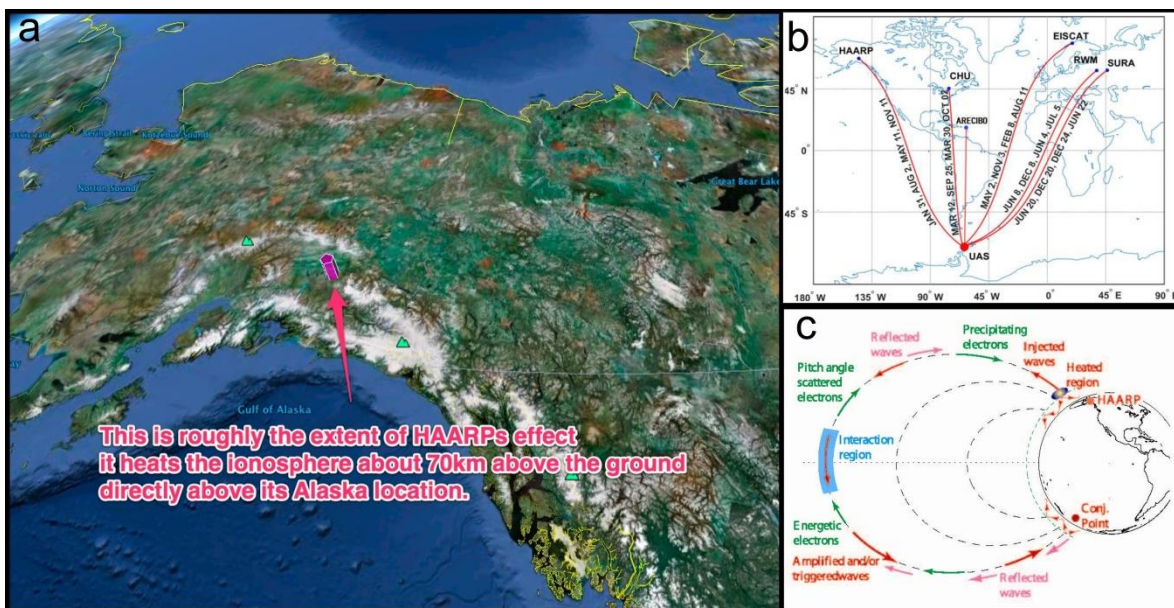

Figure 3. a) Mick West’s disinformation graphic contrasted to peer-reviewed, scientific graphics b) and c) showing that electromagnetic waves produced by HAARP and other ionosphere heaters can travel “thousands of kilometers”.

MOTIVES, OPPORTUNITY, AND PREDISPOSITION

Some potential motives for punishing Turkey by using the earthquake-triggering geophysical weapon include the following as described [63, 64] with references:

- Turkey is blocking Sweden’s and Finland’s membership in NATO.
- Today Turkey supports Russia in the same way as China, supplying Russia with spare parts, including re-exporting equipment from the U.S. to Russian firms targeted by coercive measures unilaterally imposed by Washington.
- Turkey dismissed Brian Nelson, U.S. Treasury Under Secretary for terrorism and financial intelligence, who demanded an end to Turkey’s exports to Russia and to Turkey’s opposition to Sweden’s accession to NATO.

Jacob J. (Jake) Sullivan, current National Security Advisor to the Biden Administration, participated in the allegedly triggered 2011 earthquake in Christchurch, New Zealand as

documented in his email to Hillary Clinton [5] and therefore was fully cognizant of the means, and potential method for triggering the February 6, 2023 Turkey earthquake.

Moreover, according to Seymour Hersh [65], Jake Sullivan was directly involved in planning the eco-terrorism attack on the Nord Stream 1 and 2 pipelines allegedly perpetrated by the United States and Norway. In that capacity, we allege, Jake Sullivan had the position, predisposition, and opportunity to plan, with other high U.S. officials, an operation to deliberately trigger the February 6, 2023 Turkey earthquake by using ionosphere heaters located in the U.S. and/or in Norway (or elsewhere).

ALLEGED FIRST INSTANCE OF WAR CRIMES

Amid contradictory assertions by European leaders [66], it is important to delineate unambiguously the political alliances related to the current geopolitical situation. At the end of World War II, the United States, at the time the world's most powerful military force, together with subservient Western European nations, forged a combined political, economic, and military domination over much of the world. Western hegemony was aided and abetted by the formation of the Central Intelligence Agency in 1947 and the North Atlantic Treaty Organization (NATO) in 1949.

Independently arising, by-invitation-only, globalist organizations such as the Bilderberg Group in 1954 [67], the Trilateral Commission in 1973 [68], and the World Economic Forum (WEF), founded in 1971, directly influence global agendas. The WEF promotes the idea that a globalized world is best managed by a self-selected coalition of multinational corporations, governments, and civil organizations [69]. Moreover, secret unelected globalist operatives, sometimes referred to as Deep State, have for decades been involved in planetary treason, activities that are causing catastrophic harm to Earth's systems [70-72].

The coup d'état in Kiev, Ukraine on February 22, 2014, has been referred to as the "most blatant coup in the history of mankind" and "was organized with the support of Western services and proto-fascists" [73]. Since that time, the murder of some 14,000 Russian-speaking Ukrainians and the suppression of their language and cultural values by the corrupt Ukrainian Neo-Nazi regime precipitated Russia's Special De-Nazification Operation on February 24, 2022 [74, 75]. On December 7, 2022, German ex-Chancellor Angela Merkel revealed that in 2014, the Minsk agreements were a ruse aimed at giving Ukraine time to prepare for war with NATO's support [76, 77]. The U.S. and other NATO countries have supplied vast amounts of money, sophisticated military equipment, and intelligence to Ukraine to fight Russia [78, 79]. Nevertheless, some NATO members deny being at war with Russia [66].

On January 24, 2023, German Foreign Minister Annalena Baerbock clearly stated to the Parliamentary Assembly of the Council of Europe: "We are fighting a war against Russia" [80]. Baerbock's admission is important/relevant in light of the attack that destroyed the Nord Stream 1 and 2 natural gas pipelines on September 26, 2022.

According to world-renowned investigative journalist Seymour Hersh [81], the United States and Norway were responsible for the attack on the Nord Stream 1 and 2 pipelines [65]. The United States and Norway, NATO members, not only attacked Russia, the majority owner of the pipelines, but attacked other NATO members who own 49% of the pipelines. The Russian

company Gasprom owns a 51% share of the pipeline project, two German companies together own 31%, and a Dutch company and a French company each own a 9% share [82].

For their reported attack on the Nord Stream 1 and 2 pipelines, we allege that the United States and Norway committed war crimes, specifically, as described by the Rome Statute of the International Criminal Court [83]: Article 8 (2) (a) (iii) War crime of causing great suffering; Article 8 (2) (b) (ii) War crime of attacking civilian objects; and Article 8 (2) (e) (xii) War crime of destroying or seizing the enemy's property.

Note: Although neither the United States nor Russia is a State Party to the Rome Statute of the International Criminal Court, France, Germany, the Netherlands, and Norway are State Parties to the Rome Statute [84].

The alleged attack on the Nord Stream 1 and 2 pipelines [65] shows that the United States and its NATO allies are sufficiently devoid of moral humanitarian values as to be morally capable – not just technically capable – of deliberately triggering the February 6, 2023 earthquake in Turkey. That earthquake, along with the second 9 hours later and with aftershocks, resulted in more than 55,100 deaths in Turkey and Syria, the majority being women and children [9, 10].

ALLEGED SECOND INSTANCE OF WAR CRIMES AND CRIMES AGAINST HUMANITY

Although the alleged triggering of the February 6, 2023 Turkey earthquake was conducted in secret, the evidence presented here points to the United States and Norway, both having the means, motives, opportunity, and predisposition, as the primary perpetrators. We allege as many as 10 Western nations were complicit, that is, they had foreknowledge of the planned geophysical destruction of tens of thousands of human beings when they recalled their ambassadors from Ankara before the earthquake, but failed to warn humanity or otherwise halt the alleged deliberate triggering of the earthquake [44]. We allege as many as five Western nations were complicit, including Romania, by issuing travel warnings without specifying the reason for such warnings [44]. These Western nations, we allege, are participants in the following war crimes and crimes against humanity: Article 7 (1) (k) Crime against humanity of other inhumane acts; Article 8 (2) (a) (iii) War crime of causing great suffering; Article 8 (2) (b) (ii) War crime of attacking civilian objects; and Article 8 (2) (e) (xii) War crime of destroying or seizing the enemy's property. Many of these Western nations, including Norway and Romania, are State Parties to the Rome Statute of the International Criminal Court [84].

JURISDICTION AND RELIEF SOUGHT

We respectfully request that the International Criminal Court, under authority of Article 53 of the Rome Statute [83], initiate a full, thorough, and complete investigation of the allegations presented herein.

The seriousness of these allegations should not be minimized. Among the more than 55,100 who died in Turkey and Syria [9, 10], the majority were women and children; an even larger number of innocent human beings were seriously injured and an estimated 1.5 million people were made homeless [85]. Investigation and concomitant prosecution should not be only reserved for national leaders, but should comprise a wide net of individuals involved in making such an undeclared, illegal, and clandestine act of war possible: including high-level scientists, civilian, government and military officials, disinformation agents and their managers, and

diplomats, all of whom allegedly aided and abetted the alleged triggering of the February 6, 2023 Turkey earthquake.

We have presented allegations and evidence of at least two instances of deliberately triggered earthquakes, Christchurch, New Zealand in 2011 and the other in southern Turkey that extended into northern Syria in 2023. It would be naïve to assume that these are the only two instances of covert geophysical warfare on innocent populations involving ionosphere heaters. In fact, there have been allegations of other triggered earthquakes [86-94], the veracity of which we cannot attest. In 2002, 90 deputies of the Russian State Duma demanded an international ban on geophysical experiments, and expressed concern for the development of the ionosphere-heater weapon in Alaska (USA), Norway, and Greenland noting [4]:

“The significance of this qualitative leap could be compared to the transition from cold steel to fire arms, or from conventional weapons to nuclear weapons. This new type of weapons differs from previous types in that the near-Earth medium becomes at once an object of direct influence and its component.”

In addition to our request for an in-depth comprehensive investigation with concomitant prosecutions, we respectfully request the International Criminal Court to include full public disclosure of mankind’s present geophysical scientific and technological capacity to modify Earth’s natural processes so as to cause them to become weapons of war.
